## Projects

**Software Engineer**

Jan 2020 – till Date

**Project Name: Enterprise Automation**

**Tech stack: UI Path**

**Description:**

I worked on an automation project. In which we get the data from the HR team, and we compare the date with the external web adapter.

**Responsibilities:**

- Involved in gathering and grooming the business requirements of the project.
- Involved in the project planning and effort estimations.
- Shared the knowledge and experience with the Business Analysts in resolution of conflicting requirements of application by participating in repeated walkthroughs.
- Created and modified the User Interface Rules (Harness, Section Rules), Activities, Data transforms, Decision rules, Validations, Declarative rules etc., as required by the application.
- Designed and developed the Process flows that represent the business process.
- Provided solutions and designs for the new requirements based on the requirement applicability in framework and implementation layer.
- Worked on integrations – services requests, response mappings.

**Associate Software Engineer**  
**Mphasis Limited, Bangalore, Karnataka**  
**Name: Enterprise Automation**  
**Tech stack: UI Path**

**June 2019 – Nov 2021**

**Description:**

Travel Splash needs the ability to track where their employees are traveling to, expenses, and what state/phase their employees' requests are in. The goal of the project is to build a solution from the ground up. This build should be able to allow a Travel Splash employee to submit a travel request with the ability to meet requirements, track the process from start to finish, and have the necessary approvals and booking that is needed.

**Responsibilities:**

- Designed and implemented user interfaces using Harness, Flow Actions, and Sections.
- Hands on experience in writing Activities and steps for business logic Implementation.
- Worked on configuring Circumstance rules.
- Experience on using Data Pages and Report Definition.
- Extensively worked with Clipboard and Tracer for the troubleshooting the issues
